

CAIN CORP.

LETS COOEE

Respected Principal Sir,

Hello sir, This is Sunil.V from 3rd year IT Department in Dr.NGP Institute of technology. sir, I have a startup called "CAIN CORP". And now CAIN CORP proudly presents its first product "CAIN Box".

The CAIN Box actually is a product which is combined venture between the classroom and automation device, which makes the classroom full automation and saves electricity. And this device which includes voice activation also. Then this CAIN Box also includes a feature of mobile signal Jammer. Were as students can't use mobile phones inside the classroom. And I promise that this device can be assembled with very low cost in INDIA. We believe this revolutionary product should be installed in every classroom.

We hope that the "Mission Energy Challenge" – one of the campaign's biggest components and India's first televised eco-challenge – will create awareness and let us be a part of it. JAI HIND!

Sincerely,

Sunil.V
CEO of CAIN CORP.
